What authorizes DSNY to make this rule? Sections 753 and 1043(a) of the New York City Charter and section 16-120 of the New York City Administrative Code Section authorize DSNY to make this proposed rule. This proposed rule was not included in DSNY's regulatory agenda for this Fiscal Year because it was not contemplated when DSNY published the agenda.

Where can I find the DSNY's rules? DSNY's rules are in Title 16 of the Rules of the City of New York.

What laws govern the rulemaking process? DSNY must meet the requirements of Section 1043 of the City Charter when creating or changing rules. This notice is made according to the requirements of Section 1043 of the City Charter.

Statement of Basis and Purpose

DSNY rules currently allow for all commercial establishments to set out their waste and recyclable materials within one hour of closing, provided that the scheduled collection occurs before the establishment next reopens for business and only if such materials are placed out for collection in receptacles with tight-fitting lids. Those establishments that place materials out for collection in bags, regardless of the time they close, may place such materials at the curb no earlier than 8:00 p.m.

Under this proposed rule, all food-related businesses must set out any putrescible solid waste, including refuse and organic waste, at the curb for private carter collection in rigid receptacles with tight-fitting lids.

The proposed rule would not apply to recyclable materials other than organic waste. The proposed rule would also not apply to food-related businesses that receive off-street collection, including collection that takes place in a loading dock.

Additionally, the rule sets forth maintenance and storage requirements for such receptacles.

These changes are a part of the City's commitment to cleaning up New York City streets and reducing food sources for rats. Food-related businesses are large generators of putrescible waste, including organics, and bags of waste set out for collection on the curb, even when in compliance with existing waste setout requirements, attract rats and vermin. Requiring these businesses that produce a disproportionate amount of food waste to place their putrescible

waste in sealed containers will meaningfully limit potential food sources for vermin. DSNY is working closely with the Department of Health and Mental Hygiene to ensure that these changes reflect a shared goal of health and safety for restaurants.

These changes align with other City initiatives to increase the use of containers for waste storage and collection, creating cleaner, more livable, and more vibrant streets and neighborhoods across New York City.
