

Dear DOB,

I am a mom of 3 kids living in Brooklyn.

I am deeply concerned for their future and the future of our city.

We have experienced flooding and flooding from our ceilings due to extreme water fall. Never before have I seen the proportion of these climate conditions in our city.

That's why I am advocating for a strong LL97 law.

We have to make sure it isn't weakened or that stake holders buy their way out of doing their share.

1.) no 2 year delay and if so not without deeper cuts to make up for the extra carbon. Sorry but math is math.

2.) no REC loopholes, like buying indulgences, we see you! Only up to 30% of pollution over the limit.

We have all put a LOT of work into this law, please don't let a few selfish interests win over the health and wealth of our city!

Thanks,

Kathy Malone
