PROCEEDINGS

MS. LIGUORI: Good morning and  
welcome.

My name is Madelynn Liguori. I am  
Senior Counsel in the Bureau of Legal  
Affairs for the Department of  
Sanitation. Thank you for attending  
this public hearing this morning.

DSNY is conducting this remote  
hearing in accordance with the  
requirements of the City Administrative  
Procedure Act. The purpose of this  
hearing is to receive comments from the  
public on DSNY's proposed rule relating  
to the use of certain receptacles by  
certain entities that receive Department  
collection service.

This rule was published by DSNY in  
The City Record on July 8, 2024 with a  
scheduled hearing date of today, August  
8, 2024. Additionally, DSNY emailed  
copies of the rule to all New York City  
local elected officials, the City's 59  
community boards, media and interested  
parties, and published the proposed rule

1 on its website.

2 This proposed rule would require  
3 that all buildings that receive  
4 Department collection, other than  
5 residential buildings containing 10 or  
6 more dwelling units, set out any refuse  
7 at the curb for DSNY collection in rigid  
8 containers with tight-fitting lids.  
9 This requirement would go into effect on  
10 November 12, 2024.

11 Please note that the published rule  
12 indicated November 13th, but this was a  
13 typographical error that will be  
14 corrected in the notice of adoption.

15 By June 1, 2026, the proposed rule  
16 would require that such rigid containers  
17 with tight-fitting lids be purchased  
18 from an authorized vendor. Such  
19 authorized vendor would be chosen  
20 through a competitive procurement  
21 process and such receptacles would be  
22 available for purchase from a retail  
23 outlet or online platform.

24 This rule would allow all buildings  
25 and entities that received Department

1 collection, or are applying for  
2 collection service, to apply for and  
3 receive a waiver if compliance would  
4 create a public safety hazard for  
5 pedestrians or would pose an  
6 unreasonable hardship.

7 Instructions related to such waiver  
8 requests would be outlined on the  
9 Department's website. There will also  
10 be an appeals process for those  
11 buildings or entities that are denied  
12 such waiver requests.

13 These changes are a part of the  
14 City's commitment to cleaning up New  
15 York City streets and reducing food  
16 sources for rats.

17 Residences and other buildings that  
18 received Department collection are  
19 generators of refuse, and bags of waste  
20 set out for collection on the curb, even  
21 when in compliance with existing waste  
22 setout requirements, attract rats and  
23 vermin. Requiring such buildings to  
24 utilize a specific City approved  
25 receptacle for the disposal of refuse

1 will allow DSNY to streamline collection  
2 and further limit potential food sources  
3 for vermin.

4 These changes align -- I'm just  
5 going to interrupt one second. If  
6 everybody can please mute themselves  
7 unless you are testifying, I would  
8 greatly appreciate it.

9 (Complying.)

10 MS. LIGUORI: Okay. These changes  
11 align with other City initiatives to  
12 increase the use of containers for waste  
13 storage and collection, creating  
14 cleaner, more livable and more vibrant  
15 streets and neighborhoods across New  
16 York City.

17 A court reporter is present today  
18 and will record the hearing. You may  
19 present an oral statement or submit  
20 written comments concerning the proposed  
21 rule. We have been accepting written  
22 comments on the proposed rules since it  
23 was published. Today is the deadline  
24 for submission of written comments.

25 Such comments may be emailed

1 directly to nycrules@dsny.nyc.gov by 5  
2 p.m. today. DSNY will make available a  
3 copy of all written comments received  
4 through today, together with the hearing  
5 transcript, for viewing on its website  
6 within the next few weeks.

7 DSNY will carefully consider all the  
8 comments it receives today at the  
9 hearing and all written comments it  
10 receives.

11 I will begin calling those of you  
12 who wish to speak this morning in the  
13 order in which you have signed up to  
14 testify. While the notice asked that  
15 persons wishing to testify sign-up in  
16 advance of this hearing, anyone wishing  
17 to testify at this time may do so by  
18 indicating in the chat area that you  
19 wish to testify by indicating your name  
20 and affiliation, if any.

21 When you speak, please say your name  
22 and affiliation, and speak slowly and  
23 clearly so that the court reporter can  
24 understand and accurately record your  
25 statement. We also ask that you limit

1 your statement to three minutes.

2 I'm now going to be calling to speak  
3 Claire Miflin for the Center for Zero  
4 Waste Design.

5 Claire?

6 MS. MIFLIN: Yes, thank you.

7 My name is Claire Miflin. I'm  
8 Executive Director of the Center for  
9 Zero Waste Design. Our organization  
10 came out of the Zero Waste Design  
11 guidelines, which were developed with --  
12 in collaboration with DSNY and City  
13 agencies, stakeholders, and they showed  
14 how waste containerization can be  
15 designed to help reduce waste, improve  
16 street-scapes, and improve labor.

17 So, we really believe in waste  
18 containerization, but we see that the  
19 recent plans have been developed without  
20 consultation and they could be vastly  
21 improved. The current plans go against  
22 these own goals of improving pedestrian  
23 mobility and the quality of the public  
24 realm, and they will not help us reach  
25 our targets for waste reduction and

1 greenhouse gas emissions.

2 We visited hundreds of buildings to  
3 see how waste is managed and we know  
4 that one to nine unit attached walk-up  
5 buildings very often have no space to  
6 store bins inside, or they have stairs,  
7 so it's difficult to move bins up and  
8 down so this will lead to bins  
9 permanently on sidewalks.

10 Given that almost half of New York  
11 City's sidewalks are narrower than nine  
12 foot, there simply won't be enough clear  
13 path to walk, let alone for wheelchair  
14 users or stroller pushers.

15 And while the rule allows for  
16 waivers, a number of waivers will be  
17 impractical. And then even if -- what  
18 about the buildings that have  
19 storefronts on the ground floor? Many  
20 of these retail businesses are already  
21 struggling, blocking their storefronts  
22 with commercial trash bins we've seen  
23 already.

24 Adding residential bins as well will  
25 just make things worse for the business.

1           It'll block the sidewalks. You can have  
2           eight bins outside an eight-unit  
3           building for commercial and residential  
4           waste, and it'll just degrade the  
5           sidewalk experience and make sidewalk  
6           dining impossible.

7           A much better solution for these  
8           buildings would be to use the large  
9           containers in the street, and share  
10          them, and provide them for every waste  
11          stream, not only trash. It is well  
12          known that doing a trash-only system  
13          will make people recycle and separate  
14          waste less.

15          I mean, it's the organics that we  
16          need to containerize, so why are we  
17          focusing on trash if we want to focus on  
18          rats? It's the organics that need to be  
19          containerized.

20          So, New York City Building code was  
21          changed in 2012 to require recycling  
22          bins to be located next to trash chutes  
23          so you have equal convenience disposal  
24          because it has been proven, if you make  
25          trash more convenient than recycling of

1           organics, you'll get reduced diversion  
2           and we'll be further away. You know, if  
3           a building has a trash bin outside for  
4           residents on the sidewalk, but not  
5           recycling of organics, many residents  
6           will just think, "My building doesn't  
7           recycle" and not bother to separate.

8           So, while we understand we need to  
9           get things done, we've been thinking  
10          about this since 2017 and we would love  
11          to work with DSNY to come up with a  
12          better plan. We don't want to just  
13          communicate with you via hearings and  
14          the press. We want to work with you as  
15          stakeholders to get to a better plan.

16          We can turn this around. We want to  
17          work with you on the large buildings as  
18          well cause there are better solutions  
19          for street-scapes, better solutions for  
20          labor, and better solutions, most  
21          importantly, to get us to zero waste, as  
22          it has been mandated by City Council,  
23          and to improve our recycling rates,  
24          because then we can celebrate successful  
25          implementation of waste

1 containerization, and better  
2 street-scapes, better public realm.

3 Since COVID we all know how  
4 important the public realm is and then  
5 we can celebrate success together  
6 because, as any mother knows, when  
7 something you really care about goes  
8 wrong, saying, "I told you so" brings no  
9 joy.

10 Thank you.

11 MS. LIGUORI: Thank you very much.

12 The next person I have up to testify  
13 is Ilan Rabinovich.

14 Ilan?

15 (No response.)

16 MS. LIGUORI: Okay. We will skip  
17 him and go back.

18 Anna Sacks?

19 MS. SACKS: Hi. I'm representing  
20 the Solid Waste Advisory Boards.

21 So, the Solid Waste Advisory Boards  
22 of Manhattan, Brooklyn, the Bronx and  
23 Queens request that DSNY withdraw, for  
24 at least six months, the proposed  
25 amendment scheduled to go into effect in

1 November on November 13, 2024.

2 The rule doesn't take into account  
3 the City's previous environmental  
4 commitments, has serious potential  
5 negative consequences that need to be  
6 addressed, and the cost may not outweigh  
7 the benefits.

8 Furthermore, suspension of the  
9 implementation of this rule change will  
10 enable proper consideration,  
11 consultation, and review by affected  
12 stakeholders, in particular community  
13 boards.

14 More importantly, the suspension  
15 will allow the Administration to focus  
16 on the success of the curbside organics  
17 collection program and waste reduction  
18 and diversion more broadly to achieve  
19 the City goals of sending zero weight to  
20 landfills by 2030 rather than the  
21 current approach of containerizing to  
22 hide, not reduce, our trash.

23 We don't think the City has taken  
24 into account all the potential negative  
25 consequences from this new rule.

1 Containerizing only trash and not  
2 recyclables hides the very waste stream  
3 the City's charged with reducing. We  
4 expect the City's diversion rate to  
5 further decline.

6 The convenience and prominence of  
7 the trash bins will lead New Yorkers who  
8 care about recycling to put all -- who  
9 care less about recycling to put all  
10 their waste, including recyclables, into  
11 the trash bin. For example, one M-SWAB  
12 member learned from a resident in the MP  
13 trash container pilot that while they  
14 used to take both trash and recycling to  
15 the basement, they now take the trash  
16 out with them when they leave their  
17 apartment and must make a separate trip  
18 to the basement for recycling,  
19 discouraging diversion. The convenience  
20 and prominence of the trash bins will  
21 lead New Yorkers to put all of their  
22 waste, including recyclables, into the  
23 trash bin.

24 In an effort to get bags off of the  
25 street, the City neglected to consider

1 where the impacted residential buildings  
2 will store the trash bins. Buildings in  
3 New York City have notoriously limited  
4 unused space, so we would expect that  
5 these -- we expect that we will end up  
6 with permanently cluttered sidewalks.

7 Sidewalks cluttered with trash bins  
8 will result in narrower walkways that  
9 are harder for people using strollers or  
10 wheelchairs to navigate, and  
11 aesthetically less attractive --  
12 attractive blocks and neighborhoods.  
13 New York City is well on its way to  
14 becoming "Bin City".

15 The new rules were also made without  
16 consideration of the new workflow it  
17 will require DSNY to adopt. Sanitation  
18 workers will need to wheel the 55-gallon  
19 bins from the sidewalk to the Sanitation  
20 truck, navigating tightly packed cars --  
21 tightly parked cars. They will then  
22 need to hook up the bin to the truck,  
23 empty it, wheel the bin back to the  
24 sidewalk, and repeat this for all the  
25 small bins on each block. This will

1 result in an increase in the amount of  
2 time Sanitation spends collecting trash  
3 and an increase in traffic congestion,  
4 vehicle idling, and vehicle exhaust  
5 pollution.

6 Instead of focusing on  
7 containerizing trash, the City should  
8 double-down on the efforts they have  
9 already committed to, such as organics  
10 selection, and expand education to  
11 ensure residents understand the value of  
12 these efforts and are motivated to  
13 comply to achieve our zero by '30 goals.

14 As a strategy to mitigate rats, the  
15 Administration should focus on  
16 containerizing rat food, "organic  
17 material", through the emerging curbside  
18 organics program. Currently, the  
19 curbside organics program has a five  
20 percent capture rate in Queens, meaning  
21 that 95 percent of eligible organic  
22 material is going into the trash, and  
23 thus is still available to rats.

24 This low capture rate also results  
25 in near empty trash -- empty trucks

1 driving around our City and a higher  
2 cost per pound of organics relative to  
3 trash and recyclables. We fear that the  
4 low capture rate will make the curbside  
5 organics program susceptible to future  
6 budget cuts.

7 Instead of devoting a significant  
8 amount of time and money into  
9 containerizing trash, which has these  
10 numerous negative effects, including  
11 massive export costs and methane  
12 production, the Administration should  
13 devote these resources to making the  
14 curbside organics program, which both  
15 targets rat mitigation and increases the  
16 City's diversion rate success.

17 The City should invest in reducing  
18 the amount of trash produced in the  
19 first place and diverting what can be  
20 diverted. Focus should be spent on  
21 increasing and integrating localized  
22 recycling and composting infrastructure,  
23 moving away from single-use plastics and  
24 other disposable items, deconstruction  
25 instead of -- instead of demolition, and

1 diversion of reusable building materials  
2 and furniture, programs for minimizing  
3 single-use plastics and re-homing  
4 useable furniture and other items for  
5 public schools, repair incentives, and  
6 other waste reduction programs would  
7 positively benefit the local community,  
8 and environment, and help our City make  
9 good on its environmental commitments.

10 Lastly, without understanding the  
11 true cost of containerizing trash, it's  
12 hard to weigh in against the benefits.  
13 We would like to understand how many  
14 millions of dollars the City is spending  
15 to containerize the trash of one to nine  
16 unit buildings, including retrofit --  
17 retrofitting trucks, subsidizing the  
18 cost of the bins, and increases in labor  
19 costs.

20 We also question why the trucks need  
21 to be retrofitted to lift the -- and  
22 empty the bins when the Sanitation  
23 workers will likely need to lift the  
24 bins above parked cars to maneuver. If  
25 the bin is light enough to lift above

1 cars, it should be light enough to lift  
2 into the trash truck.

3 Further, we believe these millions  
4 of dollars would be better spent on the  
5 initiatives to reduce and divert waste  
6 and provide much needed education  
7 mentioned above.

8 Based on all the aforementioned  
9 points, we therefore reiterate our  
10 request that DSNY withdraw, for at least  
11 six months, the proposed amendment to  
12 allow for proper consideration,  
13 consultation, and review by affected  
14 stakeholders.

15 Thank you.

16 MS. LIGUORI: Thank you very much,  
17 Ms. Sacks.

18 I'm now going to call Ilan  
19 Rabinovich because I believe he just  
20 joined.

21 Mr. Rabinovich?

22 MR. RABINOVICH: Yes, hello. I  
23 believe my audio is on.

24 You know, I just wanted to point out  
25 that we're -- I'm supportive of anything

1 that gets trash bags off the streets. I  
2 think we're -- in 2024 there's no reason  
3 we should be in a City where I walk by  
4 piles and piles of trash everywhere --  
5 at least not in the U.S., and definitely  
6 not in the City of New York -- however,  
7 I have a number of concerns with the  
8 current proposed rules.

9 One is, there seems to be a monopoly  
10 from a single company that lets you  
11 approve when we can purchase these bins.  
12 That seems problematic. You know, We  
13 should have some competition here. I'm  
14 Curious who got a kickback there.

15 The second is, not -- not all of our  
16 properties are set up in a way where  
17 large bins like this can be brought to  
18 the curb easily. For me, I'm going to  
19 have to carry it up a flight -- carry  
20 the bins up a flight of stairs and down  
21 a flight of stairs because of how my  
22 building is set up. I Would love to  
23 change that, but landmark rules will not  
24 allow me to do so.

25 And then, finally, I just want you

1 all again to reconsider the way you  
2 process fines, both for this regulation  
3 and future regulations. As a homeowner,  
4 I'm constantly being fined by DSNY for  
5 things that other people do as they walk  
6 by my house at 3 in the morning.

7 Though, people come by; they steal  
8 my cans. They rifle through the bins;  
9 they even steal the trash cans. In one  
10 case, I caught somebody on video  
11 emptying my trash onto the street to  
12 steal the bag that the trash was in  
13 because he needed it for something  
14 else -- I don't know what.

15 But you know who got the fines in  
16 all those situations, it was me. Didn't  
17 matter that I had video evidence; didn't  
18 matter that I had photos. I sent them  
19 all in. Was told I still owe the \$100  
20 fines. As a rent stabilized property  
21 owner, that's quite problematic. \$100  
22 might seem a lot to you all, but that's,  
23 in some cases, more than 10 percent of  
24 the rent I'm allowed to collect.

25 So, you know, please rethink the way

1           you're implementing containerization and  
2           please rethink the way that you're  
3           implement -- you implement the fines  
4           that you put on owners. We're not  
5           looking for trash to be on the curb or  
6           in front of our homes. We do our best  
7           to keep these places clean. But New  
8           York is a high traffic City and people  
9           do come by and do inappropriate things  
10          to our trash. I can't sit around 24/7  
11          monitoring them and guarding for that.

12                 So, again, thank you and, you know,  
13                 please look for ways to reduce our  
14                 costs, not increase them.

15                         MS. LIGUORI: Thank you, Mr.  
16                         Rabinovich.

17                         The next up is Hannah Leshaw.

18                         MS. LESHAW: Hello. My name is  
19                         Hannah Leshaw. I am the owner of a  
20                         three-family home in the Bronx that I  
21                         also reside in and I am appearing today  
22                         to vigorously oppose these regulations.

23                         They appear to have been drafted by  
24                         someone who has no familiarity with the  
25                         actual practicalities of New York City

1 and -- and sort of what the logistics  
2 allow for in our small streets.

3 Specifically, I think of my home,  
4 which has a regularly small volume of  
5 garbage that can be maintained by two  
6 cans, but we have variations to that and  
7 there are these periods of a brief  
8 increase. That could be after a  
9 holiday; it could be at the changing of  
10 the tenant, but in this proposal, there  
11 is no mechanism to deal with those brief  
12 increases of volume.

13 I would still be required to put  
14 everything out in cans, which would mean  
15 that I would potentially have to have a  
16 miscellaneous number of extra cans just  
17 stored on my property in case.

18 Otherwise, I would have to store the  
19 bags on my property and slowly put them  
20 out over time. That is certainly not a  
21 better way to do things.

22 Additionally, putting things on the  
23 curb here makes no sense. We have  
24 narrow side streets when you take into  
25 account the freestanding mailboxes, the

1 hydrants, the treatments, and then still  
2 wanting to leave a path for walking. We  
3 have short frontage. These are small,  
4 you know, two, three-family homes in my  
5 area. We do not have the space for  
6 that.

7 Also, they're going to be stolen. I  
8 will tell you, my cans are regularly  
9 stolen from my current setup, which they  
10 are on my property, in my front yard,  
11 behind a gate. People come on and  
12 regularly steal the cans and I have  
13 reported this to the police in the past.

14 I can tell you, they laugh at me and  
15 will not take a report. So, the Mayor's  
16 idea that we will go to the police is  
17 really just quite laughable.

18 And then, finally, I would say that  
19 the plan that we are going to ultimately  
20 use some sort of a mechanical tipper,  
21 there's no way that's fitting on our  
22 street. Between the street where the  
23 truck will be and the cans on the curb  
24 will be this row of parked cars. I do  
25 not envision how this will work.

1           There is no way for, logistically,  
2           these Sanitation workers to maneuver the  
3           cans between the parked cars to get to  
4           the truck, and if we're talking about  
5           eliminating parking, that is not a good  
6           idea. We have already lost a massive  
7           number of spots to various DOT  
8           initiatives. We cannot afford to lose  
9           anymore.

10           So, this is just -- this really just  
11           is from top to bottom poorly  
12           conceptualized. I would encourage you  
13           all to consider extending this current  
14           plan of the late put-out and the early  
15           pickup, so that we do, you know, 8  
16           o'clock, and then shortly thereafter  
17           Sanitation comes around. That is really  
18           the best plan.

19           It would mean that there would just  
20           be a very small window where things  
21           would be on the curb. Key to that  
22           though is enforcement. I can tell you  
23           that a lot of people in my neighborhood  
24           in the Bronx do not comply with that and  
25           there has been no real effort, I think,

1 to get anyone on board with that.

2 So, those are my comments. Please,  
3 this is not -- this is not something  
4 that small property owners will be able  
5 to handle either because of the  
6 inconvenience and also because of the  
7 costs involved in repeatedly replacing  
8 these cans.

9 Thank you.

10 MS. LIGUORI: Thank you, Ms. Leshaw.

11 Next up to testify is Kelly Farrell  
12 from the Rent Stabilization Association.

13 MS. FARRELL: Hi. Good afternoon.  
14 Thank you -- good morning, Commissioner.  
15 Appreciate your time.

16 My name is Kelly Farrell. I'm from  
17 the Rent Stabilization Association, and  
18 the RSA represents approximately 25,000  
19 owners and managers of residential  
20 property, the majority of whom are small  
21 owners and would be impacted by the  
22 rules proposed today.

23 I've submitted written testimony  
24 that I know you've received and my  
25 comments here today are to supplement

1           that submission.

2           I want to first note that these  
3 government regulations are felt more  
4 acutely around small owners because  
5 these are the people who run buildings  
6 directly, and on tight financial  
7 margins, and lack the scale to absorb  
8 the impact of such government mandates.  
9 And I think the 220 comments or so that  
10 were set forth -- you know, publicly  
11 available -- they clearly state the  
12 issues that these proposed rules raise.

13           Our written testimony sets forth  
14 concerns we have about the small  
15 property owners are not a monolith and  
16 really the only thing they have in  
17 common are that they are small, and that  
18 the rules fail to address that reality.

19           In crafting a garbage bag solution  
20 today, it appears the Department will be  
21 creating a garbage can problem and how  
22 this will play out depends on the  
23 surrounding community and the ability of  
24 owners to adapt to the logistical  
25 challenges this will present.

1           Cost and theft are a legitimate  
2           concern for. All rent stabilized  
3           owners -- you know, as a six or  
4           eight-unit building, the average rent is  
5           \$1,500. You know, these are not staffed  
6           buildings. You may pay someone three  
7           times a week \$50 to come by and do your  
8           trash and some will be going up and down  
9           the block and handling some buildings,  
10          600 a month for trash.

11          If you need someone to come back and  
12          handle cans, you might be literally  
13          devoting one unit's rent per month to  
14          trash alone and that's before you  
15          account for things like taxes, and  
16          maintenance, heat, oil, and everything  
17          else that needs to be done. So, this  
18          generally is a legitimate cost issue.

19          But logistics become a more acute  
20          challenge for some. Some buildings  
21          literally have no storage space.

22          The residence sits on top of  
23          commercial space -- a deli, a dry  
24          cleaner, smoke shop -- these days and --  
25          on the ground level, and next to it is a

1 residential entry -- double-door. It  
2 faces an avenue and Fire Department  
3 regulations don't allow strollers,  
4 bicycles, carts, or anything to be  
5 stored in this entry, if there is even  
6 space to do so. Where are the cans to  
7 be placed?

8 Beyond space, smaller buildings  
9 don't have the staff, so now many owners  
10 put these garbage out at night after  
11 work. Now, getting cans back in will be  
12 a problem, and they will need to be out  
13 for hours, and the sidewalks will be  
14 significantly impacted by this proposal.

15 In my neighborhood I live in, in  
16 Manhattan, right along an avenue, and I  
17 see the commercial establishments that  
18 are already required to use containers,  
19 while illegally affix them now to all  
20 sorts of street furniture due to theft.  
21 On my block alone, out of the eight  
22 stores, three -- three stores attach  
23 things -- chain them -- one to a fire  
24 hydrant, one to a tree guard, and the  
25 third is to one of the poles, and this

1 is what I fear is going to happen up and  
2 down the blocks is there -- they are  
3 chains until the -- until Sanitation  
4 comes and what -- we will see this  
5 everywhere going forward.

6 And, obviously, it's illegal, but  
7 it's a solution that's been born out of  
8 necessity.

9 So, before going forth with the  
10 citywide mandate, the Department really  
11 should undertake a borough-based pilot  
12 to provide -- and provide the owners --  
13 receptacles to owners at no cost, and  
14 evaluate the impacts on the  
15 street-scape, the sidewalks, theft,  
16 pickup times, routes, and can  
17 placements, and look to establish  
18 furniture where into which these bins  
19 can be placed.

20 And after the pilot, the studies --  
21 and study the results and determine how  
22 best this can be implemented beyond  
23 these small pilot areas. And short of  
24 doing that, I have to reiterate, that  
25 the Department will soon be turning a

1 garbage can -- a garbage bag solution  
2 into a garbage bag problem.

3 Thank you.

4 MS. LIGUORI: Thank you, Ms.  
5 Farrell. The next person signed up to  
6 testify is Isabel Reyes.

7 MS. REYES: Hi. How are you this  
8 morning?

9 My father is an 82-year-old Hispanic  
10 landlord of a small mom-and-pop rent  
11 stabilized building in Brooklyn.  
12 Although I help my father, it's not easy  
13 to containerize trash from already  
14 overcrowded apartments, which we have no  
15 control over unfortunately, especially  
16 when trash can size are now limited to  
17 55 gallons.

18 We have 95 gallon containers, which  
19 are already full when ready for disposal  
20 every Monday, Wednesday, and Friday.  
21 Now, instead of six large trash cans, I  
22 assume we're gonna have to order 12  
23 smaller trash cans where we don't have  
24 enough space in front of the property.  
25 Now, we're gonna have to store that

1 garbage inside of a private home  
2 staircase and haul it back and forth.

3 Also, we weren't really included in  
4 this process and this decisionmaking.  
5 How will the bins be returned to the  
6 property? I'm assuming they're going to  
7 be times where the bags are going to be  
8 stolen; trash cans will be stolen. For  
9 example, we have to chain ours to the  
10 house, otherwise you're going to spend a  
11 lot more money on trash cans than  
12 needed.

13 Also, what can be implemented to  
14 make this transition easier for small  
15 homeowners? Please reconsider these new  
16 guidelines and consider buildings and  
17 homeowners alike.

18 Thank you.

19 MS. LIGUORI: Thank you, Ms. Reyes.

20 I'd now like to call Jim Wright from  
21 AIANY Transportation & Infrastructure  
22 Committee.

23 MR. WRIGHT: Good morning. My name  
24 is Jim Wright, and for this hearing, I'm  
25 representing myself.

1 I'm an transportation architect,  
2 urban designer, and advocate for  
3 sustainable infrastructure and a world  
4 class public realm in all parts of the  
5 City. I support a coordinated approach  
6 to street and sidewalk management, which  
7 prioritizes pedestrians while balancing  
8 the needs of all uses.

9 Those of us who support a complete  
10 streets approach to public space  
11 management have long supported a well  
12 managed waste removal and recycling  
13 network that includes containerization  
14 for commercial and residential buildings  
15 to replace the chaotic and unsanitary  
16 bag system now in place. While I  
17 support the City's overall goal of waste  
18 containerization, the proposed  
19 implementation strategy falls short of  
20 best practices waste collection  
21 strategies in several areas.

22 One, many small residential  
23 buildings do not have indoor space to  
24 hold bins. These bins will often be  
25 stored between pickups on sidewalks

1 within three feet of the building line,  
2 if they follow the rules, according to  
3 the proposed rules.

4 The storage location is inefficient  
5 operationally and produces unnecessary  
6 conflicts with other uses that share the  
7 sidewalk; a minimum eight-foot  
8 unobstructed lane for pedestrian  
9 circulation, as well as conflicts with  
10 sidewalk cafes, retail storefronts,  
11 displays, street trees, sidewalk  
12 hatches, and other sidewalk furniture.

13 Two, despite being covered, the bins  
14 will be unsightly and smelly in between  
15 pickups, particularly in hot  
16 temperatures which now run from May  
17 through September and beyond. It could  
18 be argued that this is no worse than the  
19 black bags now placed on the sidewalk at  
20 the curb. However, the goal should be  
21 to improve the public space, not just  
22 move the trash from one place to another  
23 on sidewalks.

24 Three, the proposed rules do not  
25 require that recycled materials be

1 placed in containers, so those materials  
2 will still be bagged while waiting for  
3 pickup, further clogging sidewalks.

4 Four, the proposed rules do not  
5 address containerization for organic  
6 waste, which is being phased in under  
7 DSNY's compost -- composting program,  
8 but is struggling to achieve its  
9 environmental goals.

10 Five, by rolling out the transition  
11 in a piecemeal and inconsistent way,  
12 DSNY is missing a real opportunity to  
13 educate and train users for a new and  
14 complete waste recycling, composting  
15 system.

16 Fortunately, there's a  
17 straightforward solution to these  
18 problems, locating waste, recycling and  
19 composting containers in the street curb  
20 lane.

21 The Center for Zero Waste Design has  
22 developed a realistic strategy for  
23 shared street containers at the curb  
24 line -- curb lane where they belong; the  
25 same type of containers, which are

1 proposed by DSNY for trash, from large  
2 residential buildings. By removing the  
3 bins entirely from sidewalks, this  
4 system is not only more sanitary, but  
5 it's easier and safer for pickup by  
6 Sanitation workers.

7 I strongly urge DSNY and the City to  
8 adopt a more innovative and consistent  
9 approach at the beginning of the  
10 transition to waste containerization to  
11 assure that the program meets all of its  
12 potential to contribute to a more  
13 orderly, sanitary, and lively public  
14 realm.

15 Thank you for the opportunity to  
16 testify.

17 MS. LIGUORI: Thank you, Mr. Wright.

18 The next to testify is Ann Korchak.  
19 I apologize if I butchered your last  
20 name.

21 MS. KORCHAK: You were very close --  
22 Korchak. Thank you.

23 So, good morning. Thanks for the  
24 opportunity to speak this morning.

25 I help manage two small apartment

1 buildings on the Upper West Side that  
2 have been in my husband's family for  
3 decades. I also serve as the Board  
4 President of SPONI, the Small Property  
5 Owners of New York.

6 Our organization would have welcomed  
7 the opportunity to provide input to the  
8 Department of Sanitation prior to the  
9 City implementing this new trash  
10 container'ation (sic) policy -- excuse  
11 me. We are precisely the individuals  
12 the agency should be consulting before  
13 you roll-out such a plan.

14 Since we were not given that  
15 opportunity, we cannot take an official  
16 position as an organization, so today  
17 I'm just speaking on behalf of my  
18 family.

19 As small building owners, we are  
20 directly engaged with the challenges of  
21 trash management on a daily basis. We  
22 are well acquainted with the  
23 difficulties of finding adequate space  
24 to store trash cans, the challenges of  
25 ensuring tenants adhere to sorting

1 policy, the financial burden of  
2 Sanitation fines, and the stress of  
3 dealing with the rodent problem as we  
4 manage our daily trash waste.

5 Had we been consulted before this  
6 policy was finalized, we would have  
7 shared with you that each building and  
8 street in the City has its own unique  
9 challenges. For example, one of my  
10 buildings has adequate space for storing  
11 the trash cans, but limited curb space  
12 due to a tree planted by the City last  
13 year that removed two full slabs of  
14 concrete. This significantly restricts  
15 the number of cans I can place out to  
16 the curb for pickup.

17 At another building, we invested in  
18 a custom-built steel trash container  
19 designed to house our existing trash  
20 cans. The dimensions of this bin do not  
21 accommodate the new cans mandated by the  
22 City, forcing us to undertake an  
23 expensive removal and replacement  
24 process; resources we would prefer to  
25 allocate to other building maintenance

1 needs.

2 Have officials considered the  
3 expense and difficulty small property  
4 owners will face complying with these  
5 new regulations? I anticipate that my  
6 cans will be stolen, leading to  
7 additional costs for replacements.  
8 While waiting for these replacements, I  
9 risk receiving Sanitation fines for  
10 using noncompliant cans or plastic bags.

11 While I commend the City's goal with  
12 combating rats, I suggest initiating  
13 pilot programs in various areas to  
14 address potential issues before the  
15 citywide implementation. Additionally,  
16 I recommend returning to a more frequent  
17 collection schedule.

18 Historically, my husband's  
19 grandfather managed our buildings and  
20 trash was set out five days a week.  
21 Given the volume of waste produced by my  
22 tenants, more frequent pickups could  
23 significantly aid in tracking -- in  
24 tackling the City's rat problem and  
25 thank you for considering our

1 perspective.

2 MS. LIGUORI: Thank you very much  
3 for your testimony.

4 The next up is Liz Picarazzi from  
5 CITIBIN.

6 MS. PICARAZZI: Good morning,  
7 everybody. I'm Liz Picarazzi, the  
8 founder and CEO of CITIBIN.

9 CITIBIN is a Brooklyn-based  
10 manufacturer of trash enclosures. Since  
11 our start in 2012, we've installed  
12 thousands of bins in all five boroughs.  
13 In that capacity, we have surveyed  
14 hundreds of properties, both single and  
15 multi-family. With every client, we  
16 look at the number of bags and the  
17 available space to determine which size  
18 works best for them.

19 Many are space challenged whether or  
20 not they have a CITIBIN and have asked  
21 if there will be an exception process  
22 for the new NYC bin rules. Their  
23 concerns are in two areas.

24 The first, multi-family buildings  
25 with two to nine units that use 65 and

1           96 gallon wheelie-bins and would be  
2           downgrading capacity by using the 45  
3           gallon NYC bins. Superintendents in  
4           those buildings will be taking twice as  
5           many wheelie-bins to the curb at night  
6           and bringing them back in the morning.  
7           They might be better suited in four  
8           shared stationary street containers.

9           The second is residents who don't  
10          have space for the new NYC bins. This  
11          can happen with properties using  
12          45-gallon Brute cans, the most common  
13          cans used by NYC single-family and small  
14          multi-family buildings, which is  
15          considerably shorter than the NYC bin.  
16          It can also happen when trash cans are  
17          corralled in a gated area with permanent  
18          iron work.

19          In my testimony -- written  
20          testimony, I have some pictures and  
21          descriptions attached. I'm testifying  
22          to share these user scenarios with DSNY  
23          as you develop an exception process.

24          Attached are pictures of properties  
25          that fit into the aforementioned areas

1 and I will point out just one.

2 (Indicating.)

3 So, this is in my neighborhood in  
4 South Slope -- a nine-unit new condo in  
5 South Slope, Brooklyn. They're using 11  
6 65-gallon wheelie-bins, which is 715  
7 gallons. The new rule would require  
8 them to get 16 45-gallon NYC bins,  
9 taking up more wall and curb space with  
10 the five additional bins. The property  
11 managers, supers, and condo owners all  
12 want to keep using the 65-gallon  
13 wheelie-bins.

14 And then I also have a little bit of  
15 my written testimony -- some feedback  
16 from some of my clients who are property  
17 managers and superintendents -- that  
18 suggest that the stationary street  
19 containers would work better for them.

20 Thanks so much for your  
21 consideration.

22 MS. LIGUORI: Thank you very much.

23 Next to testify, Anna Humphrey for  
24 the Center for Independence of the  
25 Disabled.

1 MS. HUMPHREY: Hi. Good morning.  
2 My name is Anna Humphrey. I'm the  
3 transportation community organizer for  
4 Center for Independence of the Disabled  
5 New York. I'm here to express CIDNY's  
6 concerns about this proposed mandate for  
7 trash collection.

8 This proposal poses significant  
9 challenges for people with disabilities.  
10 Many buildings with ground floor  
11 storefronts or limited interior space  
12 will have no choice but to place these  
13 bins on sidewalks. This presents  
14 several issues for individuals with  
15 disabilities.

16 For people who use wheelchairs,  
17 walkers, or other mobility aids, bins  
18 placed on sidewalks create significant  
19 obstacles.

20 Navigating around these objects is  
21 not easy and often forces individuals  
22 into tight spaces or even onto the  
23 street, which can be dangerous. The  
24 already crowded nature of New York City  
25 sidewalks, which are often filled with

1 construction barriers and high foot  
2 traffic exacerbates the problem.

3 For those with vision disabilities,  
4 the presence of additional obstacles on  
5 the sidewalks makes navigating City  
6 streets even more challenging. The  
7 unexpected placement of trash bins can  
8 lead to accidents or injuries.

9 Sidewalks are crucial public spaces  
10 that enable people with disabilities to  
11 engage in social and community life.  
12 Accessible sidewalks are essential for  
13 them to visit friends, access  
14 businesses, and participate in the  
15 community.

16 Given these concerns, I strongly  
17 urge the Department of Sanitation to  
18 reconsider this policy and explore  
19 alternatives that maintain accessibility  
20 for disabled people, such as the use of  
21 shared permanent containers in the  
22 street similar to those proposed for  
23 larger buildings. This would keep  
24 sidewalks clear and ensure safe  
25 unobstructed pathways for all

1           pedestrians.

2                   It's crucial that the needs of all  
3           New Yorkers are considered when making  
4           decisions that affect public spaces.  
5           Accessible sidewalks are not a luxury;  
6           they're a necessity for ensuring that  
7           everyone, including people with  
8           disabilities, can move freely and safely  
9           in our City.

10                   Thank you for your attention to this  
11           important issue.

12                   MS. LIGUORI: Thank you very much.

13                   The next to testify is Matt Choi  
14           from Open Places (sic).

15                   MR. CHOI: Hello. Thank you for  
16           being here and thank you for the  
17           opportunity to testify. My name is  
18           Matt. I'm representing today Open  
19           Plans.

20                   Open Plans is a nonprofit devoted to  
21           livable streets. I would say, in  
22           general, we are incredibly appreciative  
23           of DSNY's work, especially around  
24           containerization, which we are generally  
25           supportive of. However, as has been

1           pointed out already on this call, we do  
2           have some substantial concerns about  
3           this specific rule.

4           So, overall, I'd like to focus today  
5           on the experience of the sidewalk. It's  
6           our belief that the sidewalk is our  
7           greatest public asset. It's where  
8           neighbors meet; it's where children get  
9           to and from school. It really is the  
10          thing that is under appreciated that  
11          makes New York what it is.

12          We all know that piles of smelly and  
13          leaky trash bags have degraded this  
14          experience for too long and we applaud  
15          the shift to containers. However, they  
16          don't, to us, solve a fundamental issue,  
17          which is space on the sidewalk.

18          For too long, New Yorkers have been  
19          forced to navigate narrow sidewalks  
20          crowded with mountains of trash bags.  
21          In the neighborhoods with narrow  
22          streets, this renders entire sidewalks  
23          un-walkable on collection days.  
24          Sidewalk bins may be rat proof, but they  
25          won't solve that fundamental issue of

1 obstructing sidewalk space, and as has  
2 been pointed out, many buildings lack  
3 the indoor storage; meaning, that these  
4 rows of bins will live on the sidewalk,  
5 even outside of collection days.

6 As has just been pointed out, this  
7 creates accessibility issues, as well as  
8 more quality of life concerns like  
9 visually blighting the facades and  
10 entryways of businesses and homes. We  
11 think that there is actually a better  
12 way.

13 To keep sidewalks beautiful and  
14 accessible, we would advocate for  
15 putting the trash in the curb, which is  
16 already being considered for larger  
17 sized buildings. For trash  
18 containerization and collection, instead  
19 of free parking, we think that putting  
20 this in the curb lane -- containers in  
21 the curb lane will benefit the entire  
22 City. It will also, we believe, make  
23 life easier for DSNY workers.

24 Anyone who knows a DSNY worker knows  
25 that this job is incredibly physical and

1 oftentimes dangerous. Putting bins into  
2 the curb lane that can be accessed  
3 easily by truck or by the mechanical  
4 arms of the new trucks that DSNY has  
5 been purchasing will mean that DSNY  
6 workers no longer have to break their  
7 backs.

8 The Department's own pilot projects  
9 have already shown that containers  
10 placed in the curb lane are an effective  
11 and efficient use of public space.

12 Other cities have tackled this  
13 problem by putting bins in this very  
14 place. We encourage DSNY to expand the  
15 opportunities for curb lane disposal for  
16 smaller buildings, potentially bundling  
17 different buildings together with one  
18 collection point, but overall increasing  
19 this is an option for all sorts of  
20 buildings to use, rather than ones over  
21 a certain unit size.

22 Thank you for the opportunity to  
23 testify today.

24 MS. LIGUORI: Thank you very much.

25 The next up is Lacey Tauber from the

1 Brooklyn -- from Brooklyn Borough  
2 President Antonio Reynoso's office.

3 Lacey?

4 MS. TAUBER: Good morning. Thank  
5 you to DSNY for holding this hearing  
6 today.

7 As you said, my name is Lacey. I am  
8 here representing Brooklyn Borough  
9 President Antonio Reynoso.

10 Borough President Reynoso agrees  
11 that containerization is a smart and  
12 necessary policy and has been advocating  
13 for it since he was Chair of the Council  
14 Sanitation Committee. However, he feels  
15 that this proposal, in particular, is  
16 too broad, was rolled out too quickly,  
17 and has the potential for unintended  
18 consequences that will impact our  
19 street-scapes and quality of life.

20 In April of last year, DSNY released  
21 its Future of Trash report prepared by  
22 consultancy McKinsey. The report stated  
23 that containerization is not a one size  
24 fits all solution. It reported that 50  
25 percent of the City is appropriate for

1 individual bins, particularly lower  
2 density areas such as Staten Island,  
3 eastern Queens, and southern Brooklyn.

4 The report recommended a block by  
5 block approach to determining the  
6 appropriate method of containerization  
7 considering elements such as available  
8 curb space, anticipated waste output,  
9 and street width, yet the proposed rules  
10 will apply based on building size rather  
11 than geography, and do not take the  
12 suggested considerations into account.

13 To be clear, everyone agrees that  
14 the current situation is a mess.  
15 However, nearly 20 percent of one to  
16 nine unit buildings have storefronts on  
17 the ground floor according to the Center  
18 for Zero Waste Design. They simply have  
19 nowhere to store the bins and the  
20 accompanying commercial businesses,  
21 which are also required to use the bins,  
22 often do not either. This means the  
23 bins will become permanent fixtures on  
24 our sidewalks, blocking storefronts and  
25 ground floor windows while obstructing

1 pedestrian walkways.

2 Instead, DSNY should reconsider  
3 these rules and take a geographic  
4 approach, as suggested in the report.  
5 In low density areas where bin storage  
6 is available, the bins are an  
7 appropriate solution. Outside of those  
8 areas, DSNY should fast track the  
9 rollout of stationary on-street shared  
10 containers, which the report called the  
11 only path to high density residential  
12 containerization at scale.

13 This is the right solution for dense  
14 parts of the City, for both residential  
15 and commercial waste, and DSNY should  
16 not shy away from removing free public  
17 parking spaces for what we all agree is  
18 a public good, making our streets  
19 cleaner and getting rid of rats.

20 The new containerization programs  
21 should also include recycling and  
22 organics. As designed, these rules do  
23 not incentivize recycling. Failing to  
24 include shared containers for recycling  
25 and organics in the future program won't

1           either. A smart containerization plan  
2           would be tied to a Save as you Throw  
3           model based on a bin or bag size to help  
4           increase our diversion rates and meet  
5           our zero waste goals.

6           Additionally, it is wasteful to have  
7           homeowners buy bins now only to give  
8           them access to shared containers later  
9           and rolling out new and different  
10          policies in a short time can be  
11          confusing. This will dis-incentivize  
12          the use of shared containers if and when  
13          they come.

14          In conclusion, Borough President  
15          Reynoso calls upon DSNY to rethink these  
16          rules and to take a more fine tuned  
17          approach that fast tracks shared  
18          stationary on-street containers as the  
19          preferred option for dense areas and  
20          prioritizes waste diversion and  
21          sustainability in addition to  
22          cleanliness.

23          I just want to also add one thing  
24          based on what we've heard today. There  
25          have been a couple of people who have

1 mentioned keeping the bins indoors and I  
2 think that's really concerning from a  
3 tenant accessibility and safety -- fire  
4 safety perspective.

5 That's something that should be  
6 considered as well. If they're keeping  
7 them in, you know, shared hallways or  
8 places that people need for  
9 accessibility and fire egress.

10 So, finally, according to the  
11 report, the vast majority of major  
12 cities surveyed internationally are  
13 using shared stationary containers.  
14 It's time for New York to join them.

15 Thank you.

16 MS. LIGUORI: Thank you, Lacey.

17 The next that is signed up to  
18 testify is Miley Wong.

19 Miley?

20 MS. WONG: Hi. Can you hear me?

21 MS. LIGUORI: Yes.

22 MS. WONG: Okay. Good morning,  
23 everyone. I'm a -- I own a small  
24 six-family property in Sunnyside, and,  
25 you know, I've heard a lot of good

1 reasons right now why this new policy  
2 may not work and I wanted to make sure  
3 that you share all our concerns with the  
4 Commissioner.

5 It may sound good, but in practice,  
6 it's not very practical. On my block,  
7 it's aligned with similar six-family  
8 homes. It is a very congested block  
9 with very limited parking, so there's no  
10 space between cars. So, I imagine what  
11 a Sanitation worker needs to do is to  
12 get these cans from the sidewalk to the  
13 truck, he needs to lift them past parked  
14 cars or roll the cans a distance to a  
15 hydrant -- that is if there's no car  
16 parked there -- and move the trash that  
17 way.

18 It's going to cause a pile up of  
19 cans in that hydrant area and we  
20 expect -- and will you expect the worker  
21 to roll the cans back to its original  
22 spot?

23 All I can say is this is going to  
24 decrease productivity and will cost DSNY  
25 and ultimately the taxpayer. Also, it

1 will cause additional wear and tear on  
2 the cans and it will increase the chance  
3 of my cans being stolen or lost. So,  
4 who -- so, ultimately, I'm going to have  
5 to pay for that too.

6 Right now, as a small property  
7 owner, I have to wait 6 -- wait until 6  
8 or 8 to bring out my garbage, then come  
9 back the next day to take the cans back  
10 in and do this twice a week. It's  
11 inconvenient, but I have to do it as I  
12 cannot afford to hire someone else to do  
13 it.

14 If you want to control the rat  
15 population, Sanitation and DOH need to  
16 work with other agencies also. We need  
17 to work together to figure out another  
18 way to do this. If you think it  
19 through, you know that it will not work.

20 Thank you.

21 MS. LIGUORI: Thank you very much.

22 The next one is Leslie Leong.

23 Leslie?

24 MR. LEONG: Yes, thank you for  
25 letting me testify here.

1           The Sanitation Department, with this  
2           issue, has a really well intentioned,  
3           but very, very poorly thought out  
4           solution to this problem. It just --  
5           and it's poorly thought out because it  
6           doesn't represent the ground truth that  
7           many of us who manage small properties  
8           face. In particular, I'm talking about  
9           the management of nearly 100-year-old  
10          building in Chinatown.

11          Many of you will see what I'm  
12          talking about. They understand the  
13          narrow streets, the buildings that abut  
14          each other, no alleyway to store the  
15          cans. I just don't see how I can  
16          comply, and, frankly, my experience with  
17          the Department of Sanitation is that you  
18          don't really care because you'll just  
19          slap me with fines no matter what and it  
20          seems a burden of proof.

21          I, like a previous person who  
22          testified, Mr. Rabinovich, said that he  
23          had video of a situation where he got  
24          fined and they didn't care. I did the  
25          same thing. The burden of proof seems

1 to be totally, unequivocally proof, not  
2 a reasonable doubt. But, anyway, I  
3 digress.

4 I just don't understand how I can  
5 implement your rules. I have no place  
6 to put the cans. The -- you know how  
7 narrow the streets are in Chinatown.  
8 You can't leave the can on there because  
9 that would block half the sidewalk and  
10 then I would get from some other  
11 department a fine for obstructing the  
12 sidewalk. It's a lose/lose situation.

13 I just -- you know, my basic  
14 question, how am I supposed to implement  
15 your rule? I have no place to store the  
16 cans. It's an old building without  
17 extra space. It's a crazy situation.  
18 You clearly don't understand the ground  
19 truth.

20 And in addition, why doesn't the  
21 Department of Sanitation own these cans?  
22 Then when they get stolen or damaged and  
23 everything, the Department of Sanitation  
24 has skin in the game. You stick us with  
25 the cost of the cans. You don't care if

1           they're damaged or stolen because we  
2           have to buy new ones. So, get the --  
3           you know, if you implement this rule,  
4           get the Sanitation Department some skin  
5           in the game.

6           So, sorry for this inarticulate,  
7           rambling testimony, but just explain to  
8           me how you expect me to comply with  
9           these new rules given the ground truth  
10          of a Chinatown sidewalk.

11          Thank you.

12          MS. LIGUORI: Thank you.

13          I'm up to the last person that so  
14          far has signed up to testify. So, if  
15          anyone else would like to testify,  
16          please indicate so in the chat.

17          The next person I have is Sally  
18          Wang.

19          Sally?

20          MS. WANG: Yes, I'm here.

21          Good morning. My name is Sally Wang  
22          and I would like it on record that I am  
23          opposed to this new containerization  
24          program.

25          This is another burden on property

1 owners who are already struggling with a  
2 constant stream of new rules and  
3 regulation. However, I believe DSNY  
4 will still move forward with this  
5 program, so I am submitting the  
6 following requests:

7 On DSNY's website, they need to add  
8 a separate section so that the public  
9 can understand what is coming. As you  
10 can hear, many people testifying have no  
11 idea, except speculation, as to how it's  
12 going to work, but, you know, nobody  
13 really understands the detailed plan of  
14 how it's going to work.

15 We need transparency as this is a  
16 major change to all households. The  
17 public needs to see a detailed plan.  
18 How is this going to work? How is  
19 parking going to be impacted?

20 We need to test a pilot program in  
21 several neighborhoods with street videos  
22 of this program uploaded to the DSNY  
23 site so that the public can understand  
24 how this would work in their  
25 neighborhood.

1           The public should understand the  
2           additional cost of this program. What  
3           are the savings, if any, on this change?

4           Households should only be required  
5           to adhere to the new rules after  
6           Sanitation trucks have been retrofitted  
7           or purchased and a viable plan is in  
8           place. If competitor -- if competitors  
9           have these same required cans for a  
10          lower price than the authorized dealers,  
11          households should be able to buy from  
12          these companies if they are the same  
13          size, have the tight-fitting lids and  
14          wheels. We should have a choice on  
15          where to purchase our trash bins.

16          Homeowners should be given a  
17          property tax credit as we would need to  
18          buy multiple cans for regular garbage  
19          and recyclables, probably a few times  
20          during the year, as they will be stolen.

21          We should change the current trash  
22          container put-out time from 6 to 4 p.m.  
23          That really should be made now. There's  
24          no reason why we should not be able to  
25          put out garbage at 4 o'clock if they are

1 in the trash containers.

2 DSNY needs to clarify the  
3 requirement on tight-fitting lids prior  
4 to 2026. Can we use -- for our current  
5 cans, can we use steel bungee cords or  
6 prior to 2026 will we need to buy these  
7 tight-fit -- tight-lidded cans?

8 Many households already have round  
9 cans. Why can't we put a steel bungee  
10 band around it and use it as  
11 tight-fitting lids before 2026?

12 In closing, we need more information  
13 on this change, more public outreach for  
14 awareness of what is coming, and more  
15 public hearings.

16 Thank you very much.

17 MS. LIGUORI: Thank you very much.

18 The next person I have is Sheila  
19 with IMK Partners LLC.

20 (No response.)

21 MS. LIGUORI: Sheila?

22 (No response.)

23 MS. LIGUORI: Sheila?

24 (No response.)

25 MS. LIGUORI: Okay. I will skip

1 Sheila and I will go to the next person  
2 that has indicated they would like to  
3 speak and that would be Sharon  
4 Silverman.

5 Sharon?

6 UNKNOWN SPEAKER: She's having  
7 trouble un-muting.

8 MS. SHEILA: Hi. This is Sheila.  
9 Is -- am I taking up space for Sharon or  
10 could I speak now?

11 MS. LIGUORI: Okay. Sharon, would  
12 it be okay if Sheila goes and then you  
13 can go right after her?

14 (No response.)

15 MS. LIGUORI: Okay. Sheila, Go  
16 ahead.

17 MS. SHEILA: Great. Thank you.

18 We're landlords of a small  
19 eight-unit, 137-year-old building on the  
20 Upper West Side and though I commend the  
21 City and their desire to address the rat  
22 problem, this mandatory trash receptacle  
23 bin proposal for small buildings fails  
24 to address and even scoffs at the space  
25 and the cost issues that are real

1 hindrances to small buildings to provide  
2 affordable housing.

3 If the City is truly interested in  
4 combating the rat issue and working to  
5 keep housing costs down, then these  
6 trash receptacles and all replacements  
7 should be free to housing units and no  
8 fine should be imposed upon landlords  
9 for failing to place and remove these  
10 receptacles at a designated hour. To do  
11 anything else is being disingenuous to  
12 the citizens of New York, claiming on  
13 the one hand to be working to lower  
14 housing costs, while with the other hand  
15 adding to the cost with onerous fine  
16 regulations.

17 By freely providing these  
18 receptacles, the City would be  
19 fulfilling its obligation to combat the  
20 rat issue and its public health  
21 implications, while simultaneously  
22 fulfilling its obligation to keep  
23 housing affordable. Make them free and  
24 un-fined.

25 In addition, after listening to the

1 testimony presented today, I agree with  
2 the testimony of Claire Miller (sic) of  
3 Zero Waste Design and of all the other  
4 participants. There is a slew of  
5 problems and issues that have been  
6 presented here that are being seemingly  
7 ignored or trivialized.

8 We have had our cans stolen and have  
9 them chained up. To tell us we need to  
10 report these thefts to the police, as  
11 someone else said, is laughable. When I  
12 had vandalism to our building, we filed  
13 a report and it went nowhere. The  
14 police force do not have the resources  
15 to track stolen bins.

16 I also agree with the egress  
17 problems raised here today that are  
18 ruled by the FDNY and other City  
19 agencies that need to be addressed.

20 This proposal for the bill -- bins  
21 is ill-conceived and the DSNY needs to  
22 rethink this rollout in order to address  
23 the realistic challenges facing small  
24 building owners, and the residents, and  
25 pedestrians before implementation.

1 I hope you are committed to  
2 listening to the testimony today and use  
3 the testimony to actually address the  
4 real problems brought up by all the  
5 participants that the DSNY rollout has  
6 overlooked in their haste to combat the  
7 rat problem.

8 Thank you for having this -- this  
9 testimony and I hope that we get to a  
10 point where we can actually find a  
11 solution that helps all New Yorkers.

12 Thank you.

13 MS. LIGUORI: Thank you.

14 Sharon Silverman?

15 (No response.)

16 MS. LIGUORI: Sharon, can you  
17 un-mute yourself? I know you had  
18 trouble before too.

19 (No response.)

20 MS. LIGUORI: Sharon, I don't see  
21 anything that allows me to un-mute you.

22 (No response.)

23 MS. LIGUORI: Sharon, I can't  
24 un-mute you. You have to un-mute  
25 yourself.

1 MS. SILVERMAN: Oh, I think I found  
2 it. Okay -- Great.

3 MS. LIGUORI: Okay.

4 MS. SILVERMAN: Thank you very much  
5 for -- Ms. Liguori -- for allowing me to  
6 speak late in this.

7 I'm here -- well, I logged-in as  
8 part of the Manhattan Solid Waste  
9 Advisory Board, but I'm also a homeowner  
10 and -- so, I won't speak again for the  
11 Solid Waste Advisory Board. I will  
12 speak for me as a small homeowner.

13 I happen to know a little too much  
14 information because of what I do for the  
15 SWAB and have done over the past three  
16 years.

17 We speak a lot about organics in the  
18 City. Organics is somewhere around 43  
19 percent by weight of New York City's  
20 municipal solid waste stream, and we  
21 haven't even rolled out citywide organic  
22 collection, and there has been very poor  
23 education for the public, which is  
24 necessary when you are recycling a new  
25 category.

1           Many people I speak to on a regular  
2           basis -- regular citizens -- do not  
3           understand still what needs to go into  
4           organics. Our contracts with  
5           land-filling and incineration are very  
6           long-term and are based on a weight that  
7           includes all of the weight of organics.  
8           If you remove 43 percent of that, you  
9           will have much smaller land-filling and  
10          incineration fees, plus you will have  
11          eliminated the food that the rats eat.

12          I can't get over that you haven't --  
13          Sanitation hasn't led composting work  
14          before reassessing what our trash needs  
15          are.

16          I appreciate so many of the comments  
17          that so many people today have made --  
18          Chinatown small sidewalks, parking -- it  
19          seems like it wasn't considered and that  
20          this was announced willy-nilly without  
21          public debate that we are -- we are  
22          debating here now -- but you're already  
23          ready to sell people bins, and you're  
24          not sure the program was going to work,  
25          and you're spending \$400,000 on new

1 trucks per truck. How many trucks  
2 Sanitation owns, I don't know.

3 Somebody else talked about  
4 retrofitting. What is the cost to that?  
5 We really need to take the budget  
6 because obviously Sanitation claimed  
7 that they didn't have the budget for  
8 community composting earlier in the year  
9 and we went on a very long debate about  
10 restoring that budget.

11 So, I feel like in doing the  
12 containerization project, which would --  
13 which would make the blight of the look  
14 of plastic bags hopefully go away, but  
15 no one has the space.

16 Why would you target one to  
17 nine-unit buildings first rather than  
18 large apartment buildings that represent  
19 the bulk of the City, which is where  
20 you're going to see the largest impact  
21 and benefit from any of these programs,  
22 but you have enough money to spend on  
23 all of this versus community composting,  
24 versus the education that you need --  
25 cause you need years to educate New York

1 City residents as to how to separate  
2 trash and composting.

3 You'll need -- if you can remove  
4 close to 40 percent of our municipal  
5 solid waste stream, you won't need as  
6 many trash pickups. The bins will be  
7 lighter. But you need to figure out  
8 where you get in a couple of years, and  
9 you need, in the meantime, to spend the  
10 money on getting composting to work  
11 because composting, even returns to the  
12 City, a financial benefit that can be  
13 used in parks, and playgrounds, and  
14 gardens.

15 It doesn't make sense to let it go  
16 to waste and to pay an incineration or  
17 land-filling fee to put all of that  
18 great compostable (sic) material into a  
19 system that doesn't benefit from what  
20 composting can do.

21 I think I've said most of what I  
22 want to right here right now, but I do  
23 live in the South Slope near the CITIBIN  
24 folks and it's a very small street.  
25 There's parking on both sides. That

1 parking in the City has obviously been  
2 greatly reduced, so I don't know how  
3 implementing these bins is going to work  
4 around the parking situation.

5 I don't know if having a unified bin  
6 for an entire block -- or every half a  
7 block, a third of a block -- but a  
8 permanently installed trash bin. There  
9 are a lot of these situations and issues  
10 that need to be addressed and I'm not  
11 sure why the City spent 6 million  
12 dollars to hire McKinsey and then not to  
13 follow the recommendations it sounds  
14 like from what somebody else was saying.

15 So, I implore sanitation to reach  
16 out, work with us at the SWABs. We  
17 study a lot of this at our own freewill  
18 or have degrees and careers that are in  
19 sanitation and waste. I know I do. I  
20 think this could be better thought out  
21 with a longer runway period.

22 I agree with many of the people's  
23 ideas that there should be a pilot, but  
24 really develop your compost system first  
25 because doing that will impact the

1 amount of garbage the City needs to  
2 collect from every building, and see  
3 where you are at that point, and then  
4 develop bins with lots of public input.

5 Thank you.

6 MS. LIGUORI: Thank you.

7 If anyone else wishes to testify,  
8 you can either use the "raise hand"  
9 function right now, or you can indicate  
10 so in the chat.

11 You may also continue to submit  
12 testimony until close of business today  
13 via email at [nycrules@dsny.nyc.gov](mailto:nycrules@dsny.nyc.gov) or  
14 via the City's website at  
15 [rules.cityofnewyork.us](http://rules.cityofnewyork.us).

16 Would anyone like to testify that  
17 has not already testified?

18 (No response.)

19 MS. LIGUORI: Hearing none, I'm  
20 going to call this hearing to a close.

21 Thank you for everyone's  
22 participation and have a great day.

23 Thank you.

24 (Time noted: 10:37 a.m.)

C E R T I F I C A T E

STATE OF NEW YORK)

:SS

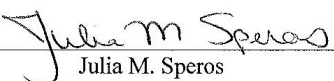

COUNTY OF NASSAU)

I, Julia M. Speros, a Notary Public within and for the State of New York, do hereby certify:

I reported the proceedings in the within-entitled matter, and that the within transcript is a true record of such proceedings to the best of my ability.

I further certify that I am not related to any of the parties to this action by blood or marriage; and that I am in no way interested in the outcome of this matter.

IN WITNESS WHEREOF, I have hereunto set my hand this 8th day of August, 2024.
